TECHNICAL SKILLS

Languages: C#, C++, C, Java, Python, SQL, JavaScript, TypeScript, HTML/CSS
Frameworks: ASP.NET, React, Next.js, Node.js, Express.js, Flask, SwiftUI, Tailwind CSS, Bootstrap
Developer Tools: Git, GitHub Actions, Jenkins, XCode, Postman, Supabase, VS Code, Visual Studio, IntelliJ, Figma, Pytest, JUnit
Technologies: AI/ML, REST APIs, GraphQL, OAuth, PostgreSQL, MongoDB, Docker, Kubernetes, AWS, Azure
Platforms: Azure DevOps, Salesforce, GitHub, Jira, Confluence

EDUCATION

Georgia State University — Atlanta, GA
B.S. in Computer Science — *Aug. 2022 – Dec. 2025*

EXPERIENCE

Software Developer Intern — May 2025 – July 2025
LocumTenens.com — *Alpharetta, GA*
– Engineered full-stack web applications with **React**, **Flask**, and **Supabase**, adding secure authentication, role-based access, and real-time data sync to modernize internal tools.
– Developed and optimized **C#** APIs for a **.NET** platform integrated with **Salesforce**, **Axuall**, and Martech systems, enabling automated credentialing and marketing workflows.
– Led API debugging and performance tuning using **Postman**, SQL, and logging tools while collaborating with Software Engineering, Martech, and Product teams to deliver scalable, production-ready solutions.

Information Technology Intern — Oct 2024 – May 2025
OTM Media and IT Solutions — *Smyrna, GA*
– Developed internal web tools for asset tracking and reporting, improving client visibility and reducing support response times.
– Provided remote and on-site support for hardware, software, and networking issues, ensuring system reliability for small business clients.

CX Intern — May 2024 – Aug. 2024
SiteOne Landscape Supply — *Alpharetta, GA*
– Automated lead management processes in **Salesforce** by designing optimized workflows and data validation rules.
– Collaborated with e-commerce dev teams on platform enhancements, improving user engagement and online ordering efficiency.

Lead Programmer/Developer — Aug 2012 – May 2022
FIRST Robotics Team — *Atlanta, GA*
– Led Java development for autonomous and driver-controlled robotics systems, achieving 8x State Championships and multiple World Championship qualifications.
– Contributed to the **Open Wheelchair Project**, developing open-source robotics solutions for mobility-impaired individuals.
– Managed technical documentation and secured $5,500+ in sponsorships for engineering initiatives.

PROJECTS

Inventory Management System | *React, Flask, PostgreSQL, AWS* — May 2025 – July 2025
– Full-stack app with authentication, editable dashboards, role-based access, and historical tracking; deployed with AWS for scalability.
– Custom CSV export with category grouping, thresholds, and color-coded formatting for audit readiness.

Calorie Tracker iOS App | *SwiftUI, MVVM* — Jan 2025 – May 2025
– iOS app with persistent ingredient storage, meal creation, and real-time calorie calculations with serving-size adjustments.
– Implemented offline data handling using **UserDefaults** for fast and reliable access.

RealNest Real Estate Portal | *React, GraphQL, AWS, ML* — Feb 2025 – July 2025
– Developed a full-stack property platform with authentication, role-based access, and real-time listings.
– Integrated a machine learning-powered price prediction model using historical market data for smarter buying decisions.
